

Gold Reserve Ashwini Vaishnaw

Ashwini Vaishnaw is one of the well known name across India and different countries across the globe. He is person behind complete transformation of Indian railway, upgradation of railway stations, upgradation of railway coaches, upgradation of railway tracks, overall enhancement in all the facilities for common citizens 24/7 in railway platforms. Indian railway is one of the largest rail network across the globe and it is also one of the most complex when it comes to routing of heavy traffic, rails with different timings. When we talk about Ashwini Vaishnaw being minister, he is one of the most respectful minister in India, well known for his honest work, sharpness for sound decision making, upliftment of all the passengers when it comes to railway services. Wise scholars often say he is good, extremely honest and more valuable than entire gold reserve of the country. Everyone knows Indian railways is now more organised and Minister Ashwini Vaishnaw is taking all possible steps to improve it further, reduce the issues related to rail accident, railway crossing heavy traffic issue in small rural cities, instalment of new machines in railway platforms, rail coaches which can convert waste into energy, several other work. Issue of rail accident usually happens because of machine failure, loco pilot, human error – knowingly done human error due to some mentally ill social elements. Minister Ashwini Vaishnaw and CRB along with other department heads working on reducing such issues completely by using innovation to safeguard life of citizens. Law enforcement agencies and railway department must issue guidelines and increase use of CCTV Cameras to identify mentally ill social elements who are knowingly doing work against Indian railway, causing harm to public property, increasing risk for human life and take strict actions to see not others will do the same error. Several countries are now using latest innovations to enhance railway department – India is on the same line, companies from different countries working in Indian railways for sustainable development. Indian railway department enabling national and international companies to participate and work independently, jointly based on core expertise, experience working with rail department different sections. In next few years there will be almost zero rail accidents because of new innovative machines, safety devices, sensors, security camera on rail lines, quality repair service of coaches & platform, regular inspection by local rail employees in different region for rail lines and bridges safety. Gradually every state is witnessing development of new railway stations with all facilities also redevelopment of old railway stations which will be good to promote more travel, commerce with ease across India and surely add alternative revenue channel for central and state government organisations also boost economy. Innovation is playing significant role in the development of Indian railways but citizens also have question what changes privatisation can bring in the entire structure of Indian railway. What will be possible advantages and disadvantages for government, common citizen, industry in general. Central and state government working jointly on evaluating the possibility for all the stakeholders also list of actions needed for the fast development of railway corridors, ongoing rail development projects, metro projects, other high speed rail projects with the support of different state government and central government departments. Entire rail ministry & rail division in different cities and states witnessed positive change in governance model and development model, citizens who commute from rail & common citizens must see how they can also support rail department in maintaining good rail infrastructure, rails, rail platforms, protestors who cause harm to railway property must pay all bill themselves. Rail department is working on upgrading all the baggage security machines in different railway stations across India with compulsory cameras in rail platform, nearby locations. Soon many other developments will be visible in Indian Rail Infrastructure & it will be great value addition for citizens & rail dependent business organisations.

Detailed version of this white paper is available for industry organisations, government departments & ministries. It is created by the joint efforts of industry associations, chamber of commerce, Member NITI, Member Assocham, Member CII.
