

Nitin Gadkari

Leader who is always known for his great work & also good governance. Agriculture is largest sector in India contributing in crop, electricity, bitumen, fuel because of policies and innovation centric work of leaders like Nitin Gadkari & coordination between central state government administration. He is not only known for utilising the waste in development of expressways but enhancing the entire agriculture crop ecosystem, increasing profitability of all the stakeholders in rural and urban areas. He is the person who pushed new concepts for market development - innovation centric products like production of ethanol from corn, rice, bamboo, municipal waste, molasses.

Pilgrimage is of significance in India. Nitin Gadkari with central and state government administration worked on some of the super good projects which are of national and international importance. Char Dham Pariyojana is a great spectacular project improving connectivity for Badrinath, Kedarnath, Yamunothri, Gangotri. Similarly Setu Bharatam is another work good for ensuring national highways get free from level crossings in sync with government's vision of promoting sustainable development. Port modernization, port linked industrialisation, coastal community development are other work areas where Nitin Gadkari's holistic work made significant social impact on overall market, economy & citizens for national and international market development. During public meetings regularly Nitin Gadkari is someone who actually never sees the public as vote count. Leader who help almost every person. Not only development related work also self realization & good health. Nitin Gadkari is strong visionary leader. Nitin Gadkari after helping several people during covid also witnessed various aspects of life which pushed him to understand that power, network, authority are something which not remains static and even for political leaders it is important to make sure they remain healthy so that they can serve the country and citizen. Nitin Gadkari is known for public service like many other leaders who are making sure to make significant social impact in the life of urban & rural area citizen. Interministerial coordination for expressway development - health ministry, agriculture ministry, environment ministry other ministries are part of giant problem and also part of giant solution. Recent case study on sustainable development speaks about clear importance of how different ministries can solve big problems if they are completely interconnected and aware of central and state government projects also regulatory clearance which can speedup sustainable development, reduce overall cost of any government work. Artificial intelligence for social good is another aspect which can clearly give details of possible solution and ways to reduce overall cost for different ongoing work. On road pollution affecting health & ecology directly, new innovation centric work enhancing agriculture growth also environment clearance reduce the overall work speed of expressway development in different states so different work equations with different impact can be made more meaningful for the welfare of citizen. Hydrogen production, liquefied natural gas, compressed natural gas somehow directly proportional to carbon emission and most importantly part of bigger matrix which can reduce pollution. Nitin Gadkari working on possibility of reducing the overall cost of hydrogen production to USD 1 per kilogram, it will possibly solve serious problems of several industries and also common citizen.

The detailed version of this white paper is available for industry organisations, government departments & ministries. It is created by the joint efforts of chamber of commerce, economist, academician, industry organisation.
